## Informix Chat with the Lab - Update Anywhere Clusters

*Wednesday, Sept 16, 8:30 AM Pacific, 10:30 AM Central, 11:30 AM Eastern, 4:30 PM London, 5:30 PM Paris*

### Inside This Issue

- 1 Informix Chat with the Lab - Update Anywhere Clusters
- 2 Informix Chat with Lab Replay - Cognos and Informix
- 2 IBM Encryption Expert with Informix

This month's Informix Chat with the Lab will on the 11.50 Hottest Feature, Update Anywhere Clusters.

*The active-active HDR cluster is one of the most exciting features in Informix IDS 11.5. This session will explore the capabilities of an HDR Active-Active cluster. We'll first examine how to set up the cluster. Next we'll look at how to connect and use the databases. Of course when discussing High Availability we'll have to look at breaking things and see what happens in the take-over scenarios.*

*Don't worry, no cheetahs were harmed in the preparation of this presentation.*

*Jerry Keesee, Director of the Informix Lab will introduce the call and Martin Lurie, Technical Specialist will be our technical speaker.*

*Participant access information:*

*URL:*

*Conference number: 8697440*

*Passcode: 2274602*

*To register for this event:*

1. Go to the URL listed above and choose Web RSVP under Join Events.
2. Enter the conference number and passcode.
3. Provide your information for the event leader and then click submit.

## Informix Chat with Lab Replay - Cognos and Informix

Last month's Chat is available for replay in case you missed it but would like to learn more about the power of Cognos and Informix.

This month's chat will be on Cognos Express, an exciting new offering featuring deep integration of Cognos & Informix technology.

Jerry Keesee, Director of the Informix Lab will introduce the call and Joseph Pusztai, Director of Cognos Mid-Market Products & Portfolio, will be our speaker. Please join to learn about Cognos Express, as well as all available Cognos & Informix solutions that help IBM customers gain better insight on their business performance.

## IBM Encryption Expert with Informix

IBM Database Encryption Expert is designed to help organizations comply with regulations and legislative acts and ensure that private and confidential data is strongly protected. Database Encryption Expert can protect sensitive information in both online and offline environments and has centralized policy and key management to simplify data security management. The tool can help:

- Minimize the risk of data backups, which are typically written to portable media and stored offsite for long periods of time, making the data more vulnerable to loss
- Reduce the risk of replicated data being stolen or lost
- Limit privileged user access to sensitive data

IBM® Database Encryption Expert provides features to encrypt and control access to data written to file systems and database backup images. This article on Developerworks describes some of the key features and mechanisms of Encryption Expert and shows you how to use them.
